1 INTRODUCTION

1.1 Scope of this manual

This manual provides information about the component parts of the BOC Edwards QDP/iQDP40 and QDP/iQDP80 Multi-stage Dry Pumps.

General Assembly (GA) exploded views of both pumps are shown in Sections 2 to 9, together with a list of the component parts shown and an indication of whether the component parts are available as spares.

Section 10 lists the maintenance kits available for both pumps.

1.2 Applicability

The information in this manual applies to production standard QDP and iQPD pumps with the following serial numbers:

QDP40 pumps with serial number 13940 and higher
QDP80 pumps with serial number 16700 and higher
iQDP40 pumps with serial number 11210 and higher
iQDP80 pumps with serial number 12414 and higher

1.3 Parts list

The GA's of the Multi-stage Dry Pumps and their ancillary assemblies are shown in Figures 1 to 14. The component parts referenced on these figures are listed in Tables 2 to 9. When you read Tables 2 to 9, take note of the following:

- The 'Ref number' is the number of the component part on Figures 1 to 14. The Ref numbers used on Figures 1 to 14 and in Tables 2 to 9 are the same numbers as used in the QDP and iQDP40 and QDP and iQDP80 General Assembly drawings.
- The entries in the 'Kit No.(s)' column are cross references to the kits in Table 10. If a part has an entry in this column, then the component part is included in the referenced maintenance kit(s).
- If a part has an entry in the 'Item Number' column, then the part is available as a spare and the entry defines the Item Number of the spare part.
- The issues of GA drawings used in this Parts Manual are listed in Table 1.
